About HAFI

HAFI Beschläge GmbH – giving the best to our customers around the world since 1978.

Since 1978

Hans Fink founded HAFI in 1978, today the company is managed by René Fink and Jochen Maier. We develop and manufacture fittings for customers around the world from our location in Elchingen, Germany. Our employees share our passion and give their best to our customers every day. In 2018, HAFI manufactured 450,000 fitting pieces for doors and windows.

Fitting products – we shape fine steel

HAFI produces a number of fitting products out of stainless steel. The shape and surface finish can be produced individually.

Whether matte-brushed or polished, stainless steel surfaces are durable, elegant and timeless. Thanks to the exceptionally smooth and non-porous surface, stainless steel handles are very dirt-resistant and long-lasting.

Customised to meet the customer's wishes

We turn our customer's ideas into reality, and accompany you from concept creation and prototype construction to multi-trade delivery of the item. Thanks to the PVD coating, we can produce fittings in various colours and surface finishes.

Multi-trade

We have the right solution for any building type and any requirement. For door handles for residential building to electronic locking systems in public buildings.

Easy installation

Our fittings prove that design and technology can go hand in hand. One example is our latest development – Flush Line technology for windows, doors and lifting-sliding doors.

Mix it!

Create your door handle.

1. Select your handle rosette.

Round 1-piece

Round 2-piece

Square 1-piece

Square 2-piece

2. Select the keyhole rosette.

Profile cylinder round

Round cylinder round

Euro round

Warded lock round

Profile cylinder square

Round cylinder square

Euro square

Change it!

With our "Push & Click" technology you can switch out door handles faster than ever before!

This way any door handle can be switched at any time to match the interior design – in seconds. Once the base structure of the Flush Line has been mounted, handles can be attached as desired by pushing and clicking with "Push & Click".

The only tool that is needed is an Allen key, in order to tighten the clipped-on handle.

1. Choose the shape! Round or square?
2. Select your door handle model. Elegant, modern or timeless?
3. Select your surface.
4. Depending on the selected surface, you can select your customised colour choice!
5. Once our Flush Line base structure is mounted you can simply clip your new door handle on, tighten the grub screw & you're done!

Push & Click!

Safety first!

HAFI protective fittings – Tested. Certified. Safe.

Break-in security

Protective fittings should effectively hinder forcible turning of the profile cylinder and a mechanical attack on the lock. HAFI protective fittings are recommended by the Bavarian Criminal Police Bureau, and are documented in the list of “protective fittings inspected and certified to DIN 18257”. Protective fittings certified to DIN 18257 are classified in the resistance classes ES 0 to ES 3, and/or certified to DIN EN 1906 (SK1 to SK4). Protective fittings from resistance class ES 1 and up are recommended.

Fire protection

Fire protection fittings certified to DIN 18273 are components of the state building codes and/or Model Administrative Provisions - Technical Building Rules (MVVTB) and require a mark of conformity (ÜZ) as a usage certificate. In accordance with this legal guideline, HAFI fire protection fittings are quality-monitored and have a mark of conformity issued by the material testing agency NRW.

Emergency exit

Panic fitting combinations certified to Norm DIN EN 179 are utilised for emergency exits, where panic situations can be reckoned with.

HAFI offers you a wide, extensive and multi-trade assortment with corresponding testing and certifications for the combination of approved fitting packages certified to Norm DIN EN 179.

Flush Line

HAFI Flush Line – Flush-mounted aesthetics and reduced rosette design.

We have adopted the design trend of reducing visible structures and have developed a new product line for door, window and lifting-sliding door handles.

The result is a combination of aesthetics, flush-mounted elements and winning easy installation.

The various surface variants in stainless steel that is polished, matte-brushed, or lacquered according to RAL request, enable the coverings of both window handles as well as lifting-sliding door handles to melt into one unit with the surface of the door element.

Window handles

The HAFI window handle is mounted on a substructure with ball locking without visible maggot screw.

The patented “push-push” function enables tool-free assembly and disassembly of the cover by simply locking the rosette onto the substructure.

Due to the flushness of the surface, the respective window handle design comes to the fore.

Door handle

Due to the reduced installation height of the rosette of only 4 mm with integrated, double-sided spring function, the Flush Line technology allows unrestricted use for object and fire doors.

Once the substructure has been fixed in or on the door leaf, the door handle with the cover rosette can be activated by a simple “push-click” function and by tightening a maggot screw can be fastened in no time.

Lifting-sliding door handles

For the first time, the patented “push-push” function allows a lifting-sliding door to be flush-mounted in aluminium or wood sliding doors in an easy-to-install way. Lacquered in the same colour, the cover and the frame melt into one.

exclusive

exklusive. extraordinary. stylish.

Would you like something special? Here we have put together a collection of door handles that are extravagant and different. Designs that were either created at HAFI's drawing tables or whose designs were created by great architects or design studios. The highest quality meets exclusive designs here.

Industrial

Industrial

Metal, concrete and the charm of an old warehouse. The loft style or industrial style thrives on reduction to functionality. The simple, rather cool but straightforward look - with corners and edges - is characterised by the combination of cold materials such as steel and concrete.

black

charcoal

cement

chalk

stainless steel

HAFI Model 212

The HAFI Model 212 - Design by Studio F. A. Porsche - captivates by its Elegance. The alternation of polished and glass bead blasted surface combines comfortable ergonomics with aesthetics.

Glamour

Glamour

Exquisite and noble thanks to materials and surfaces such as stainless steel in a variety of finishes surface colours, velvet, stucco and real wood.

The glamour style is reminiscent of pompous royal houses and often also incorporates elements from the Baroque period.

Massive, sweeping pieces of furniture meet metallic sparkling it pieces here.

HAFI Model 248

The HAFI Model 248 is perfect for the glamorous living style. This model was specially designed for the luxury hotel Lutetia in Paris by Jean-Michel Wilmotte, an international architect & designer.

Comfortable

Comfortable

High rooms flooded with light, light wood in combination with black metal, brass or rose gold create a cosy ambience. The wood creates a warm, cosy atmosphere, despite minimalist furnishings. The strong contrast of black metal gives the whole a frame and completes the picture.

charcoal

sand

chalk

rose gold

HAFI Model 311

The HAFI Model 311 - Design by Studio F. A. Porsche is a real gem. The simple geometric shape with a highly polished, circumferential bevel is an absolute eye-catcher, but nevertheless not intrusive.

Skandi

Skandi

Lots of wood and warm earth tones but still a certain simplicity. The Scandinavian living style stands for cosiness & lightness. Massive elements, despite much real wood, are rather avoided around an atmosphere of the to create freedom that lets you breathe. Reduced forms underline the feeling of openness.

chalk

grey

Pure

Pure

Clear, minimalist and pure - this is what distinguishes purism. The focus is on a few, but very high-quality highlights. A perfect balance between elegant restraint and exciting accents. The colours white, grey or soft natural tones dominate, coloured accents are only used sparingly and consciously.

grey

chalk

gold

HAFI Model 215

The Model 215 is an exciting accent in polished PV brass. The curve of the lever handle invites you to a haptically pleasant experience and captivates with its simplicity and elegance.

Urban

Urban

The pulse of the great world metropolises can continue to beat in your own four walls. In the urban living style, the colour grey - in all its facets - is the colour of choice that reflects the charm of concrete and tar of the big cities into the interior. Clinker walls, unplastered walls, linear forms and clear pieces of furniture are dominated by the colour grey and are characterised by optical accents loosened up.

black

www.hafi.de/produkte/245-870/

Bauhaus

Bauhaus

The Bauhaus style - pioneer of modernity and the high school of reduction. Furniture and objects designed according to the motto „Form follows function“ characterise the Bauhaus style. The Bauhaus School was founded in 1919 and existed for only 14 years. The influence of the Bauhaus style, however, continues to the present day and is today regarded worldwide as the home of the Avant-garde of classical modernism.

cement

sand

chalk

stainless steel

HAFI Modell 245

The HAFI Model 245 in classic matt stainless steel perfectly matches the Bauhaus style. With different surfaces and colours you can adapt each model to your furnishing style.

Contemporary

Contemporary

Unobtrusive colours such as white, grey and black are an absolute evergreen in interior design. In combination with more daring colours and metallic surfaces, they look absolutely modern.

HAFI Model 247

The ascending profile line of the HAFI Model 247 - Design by AIA Life Designers - gives the lever handle the appearance of a bird's wing and thus fits perfectly into a modern one, airy interior.
